Safety Issues Found

4

Recommendations

Detected Safety Issues

Safety Issue	Potential Risk
• Severe rust and corrosion on structural components	Structural failure leading to collapse
• Visible crack in the metal structure	Falling debris causing injury
• Loose or damaged bolts	Equipment malfunction due to compromised integrity

AI Recommendations

• Replace corroded and cracked structural components immediately
• Inspect and tighten or replace loose or damaged bolts
• Conduct a thorough structural integrity assessment
• Implement regular maintenance and corrosion prevention measures
