Detected Safety Issues

Safety Issue	Potential Risk
Workers are not wearing visible safety vests.	Trip and fall due to uneven and loose soil.
Workers are not wearing helmets.	Head injury due to lack of helmets.
Uneven and loose soil on the ground creates a trip hazard.	Drowning or falling into water due to lack of barricades or warning signs.
No visible barricades or warning signs near the edge of the water.	high

AI Recommendations

Ensure all workers wear safety vests and helmets.
Level and compact the soil to reduce trip hazards.
Install barricades or warning signs near the edge of the water to prevent falls.
Conduct regular safety inspections to ensure compliance with PPE and site safety standards.
