Recommendations

Detected Safety Issues

Safety Issue	Potential Risk
• Unsafe bending posture by worker on elevated structure	Fall from height
• Worker on elevated structure without visible fall protection	Trip and fall
• Potential trip hazard due to loose materials on the ground	Head injury due to falling objects
• Open edges without proper barricades or toe boards	Hand injury from handling materials

AI Recommendations

- Ensure workers use fall protection equipment when working at height.
- Provide proper barricades and toe boards at open edges.
- Remove loose materials from walkways to prevent trip hazards.
- Train workers on safe posture and handling techniques.
