Recommendations

Detected Safety Issues

Safety Issue	Potential Risk
• Unsafe bending posture by worker on elevated structure	Fall from height
• Worker on elevated structure without visible fall protection	Head injury due to falling objects
• Open edges without proper barricades or toe boards	Trip and fall on obstructed walkway
• Material obstruction on walkway	critical

AI Recommendations

- Ensure workers on elevated structures use fall protection equipment such as harnesses.
- Install proper barricades and toe boards on open edges to prevent falls.
- Remove obstructions from walkways to ensure safe access.
- Train workers on safe posture and ergonomics to prevent strain or injury.
