## Detected Safety Issues

| Safety Issue                                                                                                 | Potential Risk                                                |
|--------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| <ul style="list-style-type: none"><li>Obstructed walking path due to bags and items on the floor</li></ul>   | Tripping and falling due to cluttered floor and uneven step   |
| <ul style="list-style-type: none"><li>Potential trip hazard from uneven floor levels near the step</li></ul> | Injury from carrying or moving heavy bags in a confined space |

## AI Recommendations

- Clear the floor of all bags and items to ensure a safe walking path
- Mark the step with a bright color or warning tape to make it more visible
- Organize and store bags in a designated area away from walkways
